**TECHNON INTERNATIONAL** is a private limited company registered in Zimbabwe under the Zimbabwe companies Act, CAP 24:03:1996. It was founded in April 2003 to provide technical services mainly in the **calibration**, maintenance, servicing, and repair of measuring and test equipment. Its calibration laboratory's Quality Management System is going through **accreditation** to ISO 17025 with Southern African Development Community Assessment Series (SADCAS).

Pursuant to its growth strategy, Technon International has over the years expanded its scope of services to; **Occupational Hygiene and Environmental monitoring**, surveying parameters such as dust, illumination, noise, vibration, heat stress, ventilation, hazardous chemical storage compatibility surveys, ergonomic surveys, boiler, furnace, vehicle and incinerator emissions tests.

The advent of **management systems** created another growth avenue for Technon International. Its scope in this regard includes consultancy in development & implementation, training and auditing of Environmental, Quality and Occupational Health and Safety Management Systems to the requirements of ISO 14001, 9001 and OHASAS 18001 respectively.

### Branches

As of 2017, Technon International has expanded and opened a new branch in Bulawayo.

### International Projects

The services above have seen Technon International undertaking big international projects in Occupational Hygiene monitoring for all Namibian Power stations (**NAMPOWER**) in both Namibia and Angola in 2014, Environmental monitoring for Jwena-Debtswana diamond mine in **Botswana** in 2016, and calibration for **Zambia** Bureau of Standards in June 2015 and July 2016.

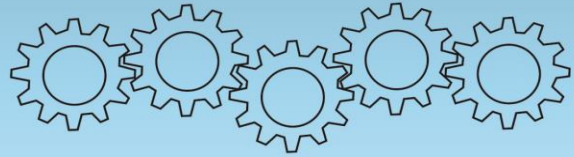

Subsequent to this footprint, Technon International has set up operations in **Namibia** under Technon Investment CC.

## MISSION STATEMENT

To provide calibration, repair and service of measuring instruments and equipment; safety, health, environmental and quality management system consultancy.

## VISION

To become a most preferred service provider in calibration, repair and service of measuring instruments and equipment; safety, health, environmental and quality management system consultancy

## VALUES

- Credibility
- Continual improvement
- Integrity
- Efficiency
- Innovation
- Team work
- Accountability
- Communication

## SHEQ POLICY

TECHNON INTERNATIONAL (PVT) LTD, prominent calibrators of measuring instruments, monitors of occupational hygiene and environmental parameters, and consultants in quality, occupational health, safety and environmental management systems, **reaffirm our** commitment to continuously provide a quality service, safely and in an environmentally sustainable manner, **each time, all the time**, to our customers, our workers, others, and our environment.

We undertake to comply with our customer's, applicable statutory, regulatory and other requirements governing our activities. We also commit to ensure health & safety of our workers and others working with them, prevent and mitigate environmental impacts of our operations at both off or onsite.

Technon International endeavors to continually improve the effectiveness of our business management system in line with our dynamic strategic plan that responds to the changing needs of our dear customers, workers health & safety, stakeholders, environment and business interests.

## HYGIENE MONITORING EQUIPMENT PROFILE

### Dust Survey

We use both passive and active monitoring depending on the obtaining environment. The Split II lite Dust Monitor is for passive monitoring and is real time. The SKC Air check 52 are for active monitoring from SKC Instruments which meets ISO 7708: 1995. Both are capable of measuring Inhalable, Respirable and Thoracic Dust.

### Light/ Illumination Measurement

Lighning for both day and night are performed using HD 400 heavy duty light meters ranging from 0 to 400 000 Lux.

## Noise Measurement

Noise survey comprise both personal dosimetry and general. Personal is specific to an individual whereas general is for the area under survey. In both cases the instruments are realtime and digital. The noise surveys are conducted in accordance with to ISO 9612 and of ISO1996 Range is from 50 to 130dB. Frequency of 20-8000Hz. All the instruments are capable of datalogging.

## Vibration Measurement

Vibration surveys are conducted using wide frequency range heavy duty Castle vibration meter with sensitivity which meets ISO 2954. The Vibration meter can assess both Hand Arm (HARM) and Whole Body (WBV). It shows velocity, acceleration and displacement measurements with software for data recording and data logging.

## Ventilation

Ventilation measurements are done with a Major Tech MT945 hot wire anemometer that has an air velocity range of 0.1-25.0 m/s, 0.3-90.0 km/h, 20-4 925 ft/min, 0.2-55.8MPH and 0.2-48.5 knots. The hot wire anemometer has got an LCD Dual display multifunction with PC interface.

### Heat Stress/ Thermal Comfort

Heat Stress and Tempstress heat stress monitors are direct reading instruments which read out the Humidity, ambient temperature and Wet Bulb Globe Temperature (WBGT). The procedure for evaluation of exposure to heat is based on ISO 7243.

### Personal ambient gas detection

Personal gas detectors we have are multi-gas with settable exposure limits and alarming system.

### Volatile Organic Compounds

We are currently using sorbent tubes with a medium term plan to acquire a PID

## SERVICES AT A GLANCE

|                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                           |

## **Hygiene Monitoring**

Hygiene monitoring scopes all workplace hazards and ergonomic situations that can affect health and safety of workers. Such hazards include heat stress, dust, noise, illumination, vibration, VOCs, chemical fumes and ergonomics.

### *Chemical fumes exposure*

### *Vibration Dosage Survey*

*Chemical exposure using personal dosebadges to determine dosage for a control measure recommendation*

### *Real-time Dust monitoring*

### *Noise and light survey*

*Dust monitoring comprises of both active and passive monitoring in all particle size ranges that includes inhalable, thoracic and respirable using state of the art equipment.*

## ***Occupational Ergonomics***

Occupational ergonomics is basically a study to determine how best a work can be adapted to suit the worker to prevent discomfort and ergonomic hazards. The survey looks at the worker, work environment and the work load

### ***Office ergonomics***

### ***Workshop ergonomics***

Office ergonomics looks how the office environment can be adjusted to suit the worker taking into account thermal comfort, ventilation, lighting, sitting postures, workstation arrangements and furniture

Workshop ergonomics looks at awkward postures, compression, prolonged standing, lifting techniques, workstation arrangement including environmental factors such as hazardous gases, heat stress, vibration, noise, illumination, dust.

### ***Lifting techniques***

### ***Awkward postures***

## ***Chemical transport and Storage Compatibility Survey***

Chemical substances have a tendency to react with other substances. In some instances these reactions are detrimental to the Safety and Health of employees and to the Environment.

### ***General chemical storage***

### ***Hazardous chemicals storage***

It is against this background that chemicals should be transported and stored according to compatibility.

### ***Chemical Reagents storage***

### ***Access controlled***

***Compatibility – means the substances can stay in close proximity without reacting at all.***

## ***Environmental Monitoring***

The monitoring includes all emission that can negatively impact on the environment such as oxides of sulphur, nitrogen, carbon as well as particulates as compared with limits prescribed by S.I. 72 of 2009 of the Environmental Management Act CAP 20:27 of 2002

***Boiler stack emission survey***

***Generator Exhaust monitoring***

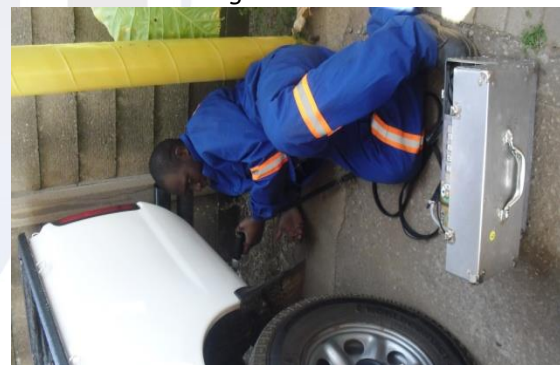

***Vehicle exhaust emission survey***

***Diesel engine exhaust tests***

***Petrol engines exhaust tests***

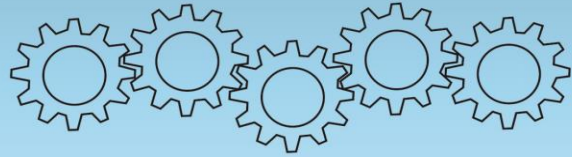

*The engines exhaust emission test extend to generators and plant and equipment that uses fossil fuel as source of energy*

## ***Management Systems***

Technon International provides training, auditing and guidance on development, implementation and maintenance of Quality, Environmental and Occupational Health and Safety Management systems to satisfy the requirements of ISO 9001, 14001 and OHSAS 18001 Standards.

### ***Environmental Mgt. System Training***

### ***Occupational Hygiene Training***

### ***Environmental Management Program***

*Done on projects already operational after the enactment provisions of EMA Act*

### ***Environmental Impact Assessment***

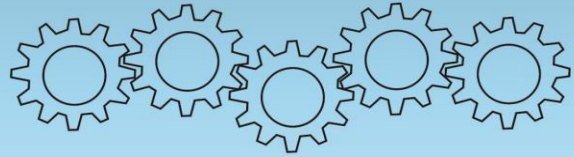

*Mainly for new projects listed in the schedule of the EMA Act*

### VALUE ADDED TAX REGISTRATION

You are hereby advised that your application for Value Added Tax Registration has been accepted.

Please note the following information in relation to your registration:

Value Added Tax Number is 10057489

Business Partner (Client) Registration Number is 200090798

Region Code 01

Station (Area of Registration) Harare Operations

#### Tax Category A

You have been placed in Category A whose tax periods are for two months ending **January, March, May, July, September and November**. Your effective date of registration is 01.09.2012

The first return is due for submission on or before 25.09.2012 and thereafter subsequent returns are due on or before the 25th of the month following end of tax period.

Yours faithfully

*L. Mawood*

(Signed) Director/ Secretary/ Principal Officer

This ...17TH... Day of .....JUNE...2013.....

#### NOTES

- A complete list of the existing directors should always be given.
- This data should always be shown, whether or not a new appointment.
- In the case of a foreign company, if the director is a corporate body, its name and the location of the principal office must be shown.
- In the case of the secretary being a corporate body, its name and the location of the registered office must be given.
- In the case of the principal officer being a corporate body or partnership, the corporate or partnership name must be shown, and if it is a partnership, all the names of the partners must be given.
- In the case of an individual, if he is director of any other company registered in this country, the names of every such company must be given.
- This applies only in respect of new appointments.
- In the case of a new appointment since the last return filed, must be stated here or elsewhere or within additional.
- Give the date of the occurrence referred to in the provisions. Both columns 8 and 9 must be completed in the event of a change.
